

Technological Innovations

1. Promotion of Plastic house technologies, as example of low cost tech (ways to reduce costs, e.g. utilizing byproducts)
2. Big Data for small farmers
3. Simple interface for semi-literate farmers
4. Stimulus integration of scattered data
5. Information on post harvest losses – Logistic support on planning needed
6. Water harvest technologies
7. Food habit transformation
8. Quality assurance technologies
9. Agro-product information
10. Complete package of improved cultivation practices
11. Traceability of quality assurance
12. Climate information on commercialization of crops/Livestock/Fisheries
13. Good database management system
14. New varieties
